### Quad Band GSM/GPRS/EDGE

Falcom USA, formed in 2003, is a strategic marketer for the Falcom products portfolio in North, South and Central America's along with the regions of Malaysia and India.

SAMBA75 is a Plug-and-Play, compact, lightweight, wireless modem that provides EDGE, GPRS and GSM connectivity for portable, handheld computers and others.

SAMBA75 allows subscribers to send and receive data, including digital images, web pages and photographs, with a transfer rate three times higher than possible with GSM/GPRS services.

It can be easily controlled by using AT command for all kinds of operations. The SAMBA75 is designed for use on any GSM network in the world.

### Drivers and Hardware

SAMBA75 drivers are available for all the Mac variants like the Mac Pro, Mac mini, MacBook, MacBook pro and the iMac.
